DETAILED ACTION

Response to Amendment

1. Applicant's arguments with respect to claims 1, 2, 8, 10-13, 19-21, 25, and 26 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 8, 12, 13, 19, 25, and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Masui et al (U.S. Patent No. 6,393,013).

Regarding claims 1, 12 and 22, Masui et al (Masui) discloses a method for establishing a link on a shared communication channel divided into a plurality of time slots comprising the steps of:

establishing a synchronous link (traffic channel 9) between a first (a transmitting terminal) and second communication unit (a receiving terminal), each communication unit is a mobile station which has a transceiver and a processor (claim 22); and

communicating a first data packet (FIG. 5C) on a first one of a set of time slots associated with the link from the first communication unit to the second communication unit by including an address (34) associated with the second communication unit in the first data packet. See col. 7, line 19- col. 8, line 3.

Art Unit: 2663

Regarding claims 2 and 13, Masui further discloses that reserving a set of the plurality of time slots for use by the link and separating each one of the time slots associated with the set by a fixed interval. See col. 7, lines 19-33.

Regarding claims 8 and 19, Masui further discloses that the system has a plurality of communication units and associated links between the units. See FIG. 1.

Regarding claims 25 and 26, Masui does not teach a frame protocol, i.e., Masui teaches a frameless protocol.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 10, 11, 20, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Masui et al.

Refer to the discussion for the claim 1 and 12. However, Masui et al (Masui) does not explicitly teach a frequency hopping method. It would have been obvious to one having ordinary skill in the art incorporate a frequency hopping scheme into Masui for more reliable communication channel with less interference.

Allowable Subject Matter

6. Claims 22-24 and 27 are allowed.

Art Unit: 2663

7. Claims 3-7, 9, 14-18, and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Soon-Dong Hyun whose telephone number is (703) 305-4550.
